Descrição da organização do projeto realizado no âmbito de Projecto e Seminário
Licenciatura em Engenharia Informática e de Computadores

Junho de 2024

1 Project Repository

DADIVA IPO platform's implementation and documentation are available through a GitHub repository available in <https://github.com/dadiva-team/dadiva-ipo>.

2 Usage

In it's current stage to use the platform a user will first need to clone the GitHub repository.

Install PostgreSQL and have it running, available in <https://www.postgresql.org/download/>.

Install .NET, guides for multiple operating systems can be found in <https://learn.microsoft.com/en-us/dotnet/core/install/>.

Install Node.js, an installation guide can be found in <https://nodejs.org/en/learn/getting-started/how-to-install-nodejs>.

After installing all the needed software.

Run the "npm install" command in the `dadiva-ipo\code\DadivaWeb` directory followed by the "npm start", to run the frontend application.

Run the "dotnet ef migrations add InitialCreate" followed by "dotnet run --launch-profile https" command in the `dadiva-ipo\code\DadivaAPI\DadivaAPI` directory.

The frontend application will be accessible in <http://localhost:8000/>
